DD&T — WEEKLY REPORT

Digital, Data & Technology · file no later than Sunday by 4:00 PM ET

Name:	David Iriarte
Group:	Digital [X] Data [ ] Technology [ ] Creative Pod [ ]
Week ending:	November 8, 2026

1 · This week in one paragraph

This week I was focused on finishing and preparing the release that contains 1) iPhone Duo Basic Support (MOB-971), 2) YoSpace Update (MOB-970), 3) Search Improvements – Support for Moments (MOB-895). All these items were combined and include in release 13.7.8(1484). During the week I also worked on preparing the release that will support YoSpace Update(OTT-271) and I also continued working with SoundStack Migration (MOB-885) I was expecting to finish that migration this week but we have a showstopper due to malfunction of parameter to avoid audio companion preroll when we send parameter after watching video preroll, we need to contact them Alberto is already on that.(MOB-989)

2 · Open items

MOB-885 SoundStack Migration – Working on moving to use of SoundStack logic on stations, removing the old Adswizz logic we needed a lot of changes in the metadata as there it comes now the companion ads.

MOB-982: **Resync Audio After Pause –** Related to the SoundStack change in order to don't lose the audio when user pauses we needed to create a new session after it plays again. This is done but needs the SoundStack integration release, will go with it.

MOB-989 SoundStack Integration – Showstopper- We need to follow up contacting SoundStack and check what solution they propose about the issues described in this card.

MOB-983 Message Center Adjustments/ MOB-965 MesageCenter visibility – Messages Center is not working/loading properly it needs a quick fix I did a research but this will go with SoundStack Integration release.

3 · Next week

MOB-885 SoundStack Migration – Finishing the integration and clean up code to prepare for release.

MOB-982: **Resync Audio After Pause –** I'll include the fix/change with SoundStack Migration

MOB-989 SoundStack Integration – Showstopper- We need to see what changes are needed after we talk to SoundStack, potentially the fix is only on their side but we still need to test that everything is working before the release.

MOB-983 Message Center Adjustments /MOB-965 MesageCenter visibility – I'll include the fix and improvements with SoundStack Migration.

MOB-963 Search for Contests(weblink support) – We had a meeting with **Mohaimanul Chowdhury** and Carlos Jimenez so implement this on the clients as backend is going to add Contest support in search.

4 · Open issues

MOB-885 SoundStack Migration – We have the ShowStopper that need SoundStack involvement to finish the integration and prepare the release.

MOB-989 SoundStack Integration – Showstopper- We need to follow up contacting SoundStack and check what solution they propose about the issues described in this card.

MOB-983 Message Center Adjustments/ MOB-965 MesageCenter visibility – I'll include the fix and improvements with SoundStack Migration release.

5 · Suggestions

MOB-885 SoundStack Migration - **MOB-989 SoundStack Integration – Showstopper** – Try to get SoundStack to look into the issue ASAP (Alberto is going to take care), let's try to setup a meeting soon so we can unblock this release.
