DD&T — WEEKLY REPORT

Digital, Data & Technology · file no later than Sunday by 4:00 PM ET

Name:	David Iriarte
Group:	Digital [X] Data [ ] Technology [ ] Creative Pod [ ]
Week ending:	November 15, 2026

1 · This week in one paragraph

This week I was focused on new releases, fixes and moving my pending items from last week. After the release at the beginning of the week we were reported an issue that was affecting older phones (NOT duo) with the auto layout at Home section (MOB-1031) which was making the view to be hidden, so we had to check fast an upload an immediate build with the solution, we did that and we released a new version with the fix which is 13.7.9 (1496). I followed up with SoundStack after their initial reply sending them a step-by-step explanation mail of how we did the implementation we're still waiting on them to unblock us, for now this is on HOLD. I also worked on other small items that are done just need to be released in the upcoming week (MOB-983 / MOB-963). We also checked appleTV yoSpace implementation we might need to get the logs to get a validation on their website, this came out because the Android part for FIRE TV had to do it during the week, we tried with Carlos Ovalles but we were not able to get the logs, I'll follow during next week so we can close this item considering that a new AppleTV version was also released to support fast channel monetization (OTT-271)

2 · Open items

MOB-885 SoundStack Migration – This is blocked due to showstopper, still waiting on SoundStack, they replied our initial mail asking for information of how we managed the integration I replied with a step-by-step mail attaching evidence.

MOB-982: **Resync Audio After Pause –** This is blocked due to showstopper, still waiting on SoundStack. they replied our initial mail asking for information of how we managed the integration I replied with a step-by-step mail attaching evidence.

MOB-989 SoundStack Integration – Showstopper- This is blocked due to showstopper, still waiting on SoundStack. They replied our initial mail asking for information of how we managed the integration I replied with a step-by-step mail attaching evidence.

MOB-983 Message Center Adjustments/ MOB-965 MesageCenter visibility – This was done during the week, will be released in next iOS version.

MOB-963 Search for Contests(weblink support) – This was done during the week, will be released in next iOS version.

3 · Next week

MOB-885 SoundStack Migration – When SoundStack gives us an update I'll make the changes or updates in the library let's see what they answer potentially the fix is only on their side but still we need to test everything properly and prepare it for release.

MOB-982: **Resync Audio After Pause –** This will be included with SoundStack Migration, depends on SoundStack release.

MOB-989 SoundStack Integration – Showstopper- When SoundStack gives us an update I'll make the changes or updates in the library let's see what they answer potentially the fix is only on their side but still we need to test everything properly and prepare it for release.

OTT-271 YoSpace Update- new Apple TV version was released we just need to check the yospace logs validation in their website, on Friday we were unable to do it we will try again on Monday and if needed we will contact them (checking this with Carlos Ovalles)

MOB-983 Message Center Adjustments /MOB-965 MesageCenter visibility – Will be released in next iOS version.

MOB-963 Search for Contests(weblink support) – Will be released in next iOS version.

4 · Open issues

MOB-885 SoundStack Migration – When SoundStack gives us an update I'll make the changes or updates in the library let's see what they answer potentially the fix is only on their side but still we need to test everything properly and prepare it for release.

MOB-989 SoundStack Integration – Showstopper- We need to follow up contacting SoundStack and check what solution they propose about the issues described in this card.

OTT-271 YoSpace Update- Validate logs in YoSpace website.

5 · Suggestions

MOB-885 SoundStack Migration / MOB-989 SoundStack Integration – Showstopper – If we don't get a solution from them by Wednesday we should push harder maybe Dennis can contact directly to the person in charge for faster response and solutions.

MOB-963 Search for Contests(weblink support) – For now podcasts audio are the only ones supported in Search we don't support shows(videos) in the search, maybe this should be something we can potentially ADD BUT also depends on the Business decisions of keeping podcast and shows as different content or be combined as in the past that we only had podcast audio and video.
